

Hill Laboratories

Podiatry Chair

Intuitive Design.
Real Value.

*Shown with
navy upholstery
and beige base*

The Hill Adjustable Podiatry Model is designed with several features usually associated with far more expensive podiatry chairs. Its quality design and craftsmanship draw from over 55 years of Hill Laboratories' manufacturing experience.

Powered by electric actuators, the HA90P has three distinct adjustable motions which position the chair smoothly, quietly, and precisely.

Adjustable height provides a comfortable 23" to 36" working range. A recline feature tilts the entire chair to any desired angle. The electric tilt back may be completely lowered to convert the HA90P to flat table.

All chair positions are controlled by convenient foot pedals. The HA90P is also available with an 'auto-return' option which automatically repositions the chair for the next patient.

Special features include a pull-out foot section for taller patients; a removable, adjustable-angle, stainless steel pan; an adjustable headpiece for patient comfort; and fold-back armrests. Optional features include a flexible-arm lamp and surgery curtain (see other side).

The contour seat and back add style and comfort. A durable vinyl upholstery, imparts a luxurious feel of glove-soft leather.

- See other side for more important information -

HA90P Features

Adjustable Armrests

Fold back out of the way when seating the patient

Adjustable Headpiece

Adjusts in height 8"
Adjusts in length 12"
